

Services: Structural engineering, earthworks modelling, stormwater and bulk services design; geometric planning and design
 Client: Triple J Property Developers cc
 Value: R 65 million
 Project Duration: June 2015 – Ongoing

Evergreens Fresh Produce Market, Gauteng

Shopping Development: Detail Structural and Civil Engineering Design

The Task

Nurizon was appointed to undertake the structural and civil engineering detail design elements of a new fresh produce market development for Evergreens in Kempton Park, Gauteng (property development by Triple J).

Design Services

The professional services appointment included the bulk services designs, stormwater attenuation infrastructure design, site earthworks and geometric planning and design of the site (earthworks platform profiling, roads geometry etc.); pavement designs for the internal roads and parking areas; and the structural engineering design for the market building structure itself.

The Result

Detail design drawings for the construction as well as construction documentation were produced as part of the project deliverables.
